This extraordinary book is an offshoot of the Seattle Study Club, a popular continuing education group with hundreds of chapters throughout the US and Canada. Based on the proposition that specific treatments and techniques come and go but comprehensive treatment planning is universal and timeless, this group unites clinicians of all levels and from all disciplines, challenging them to master the principles of total case management through interdisciplinary treatment-planning exercises. In keeping with that philosophy, this book articulates the seemingly mystical process by which master clinicians treatment plan their own cases. In the first part of each chapter, 17 of the world’s most prominent and respected clinicians candidly share the key principles that guide and inform their case-planning decisions and show stunning photographs from their cases. In the second part of their chapter, these contributors present the complete diagnostic facts and findings of one of their own cases and invite the reader to treatment plan the case. Applying the principles espoused in part one, the author then presents his/her own treatment plan and the actual treatment that was rendered along with large, full-color treatment and posttreatment images and radiographs. Because the authors represent every specialty in dentistry-periodontology, orthodontics, prosthodontics, endodontics, and oral and maxillofacial surgery—this outstanding and innovative book demonstrates comprehensive treatment-planning principles from the perspective of every clinician.
Chapter 06. Diagnostically Driven Interdisciplinary Treatment Planning-John C. Kois

Chapter 07. The Tooth in Transition: Save or Extract?-Andrew M. Alpert

Chapter 08. Approaches to Vertical Dimension-Frank Spear, Gregory Kinzer

Chapter 09. Fundamental Treatment Planning: Applications of Three Basic Principles-Henry I. Nichols

Chapter 10. Establishing a Stable Occlusal Scheme-Neil L. Starr

Chapter 11. Management of Patients with Missing/Abnormally Proportioned Teeth-Ward M. Smalley

Chapter 12. Materials Selection for Complete-Coverage All-Ceramic Restorations-Ariel J. Raigrodski

Chapter 13. Effect of Orthognathic Surgery on Overall Treatment-Stephen Rimer

Chapter 14. Orthodontic Forced Eruption in Interdisciplinary Treatment Planning-Ricardo Mitrani

Chapter 15. Improving the Esthetics of Healthy Teeth with Porcelain Laminate Veneers-Galip Gürel

Chapter 16. Human Factors in Comprehensive Treatment Planning-Michael Cohen

Chapter 17. Approach to Treatment With and Without Endosseous Implants-Neil L. Starr
