## Buch-Information

**Autor(en):** Siqueira jr., José F.

**Titel:** Treatment of Endodontic Infections

**Kurztext:**

A thorough understanding of disease etiology and pathogenesis is cardinal to any healthcare profession and provides the framework for effective treatment. Consequently, a thorough understanding of the microbiological aspects of apical periodontitis is the basis for high-quality endodontic practice based on a solid scientific foundation. The first section of this book deals with microbiologic and pathophysiologic aspects of apical periodontitis, while the second section describes the best evidence for predictable treatment and prevention of the disease. Clinical techniques and protocols to treat endodontic infections are also described in detail.

**Contents:**

Section 1 - The Infection

Chapter 1: Endodontic Infections and the Etiology of Apical Periodontitis - an Overview

Chapter 2: The Invaders: Bacterial Biofilm Communities and Pathogenicity

Chapter 3: The Defense: Host-Pathogen Interactions and Immune Response

Chapter 4: The Disease: Clinical Manifestations and Pathophysiology of Apical Periodontitis

Chapter 5: Primary Endodontic Infections

Chapter 6: Persistent and Secondary Endodontic Infections

Chapter 7: Causes of Endodontic Treatment Failure

Chapter 8: Causes of Persistent Post-treatment Pain in Endodontics

Chapter 9: Systemic Implications of Endodontic Infections

Section 2 - The Treatment

Chapter 10: Preventing Endodontic Infections

Chapter 11: Controlling Endodontic Infections - an Overview

Chapter 12: Chemomechanical Preparation

Chapter 13: Intracanal Medication

Chapter 14: Obturation of the Root Canal System

Chapter 15: Treating Failures: Retreatment and Periradicular Surgery

Chapter 16: Endodontic Emergencies of Infectious Origin

Chapter 17: Systemic Antibiotics in Endodontics"

**Fachgebiet(e):** Endodontie
