Buch-Information

Autor(en): Wolfart, Stefan / Harder, Sönke / Reich, Sven / Sailer, Irena / Weber, Volker

Titel: Implant Prosthodontics

Untertitel: A Patient-Oriented Strategy: Planning | Treatment Procedures | Longevity | Esthetics | Function | Dental Technology

Kurztext:

While a wealth of specialist literature is available on the surgical aspects of implant dentistry, there is no comprehensive, systematic textbook on the implant-supported prosthodontic rehabilitation of the patient - which is the true goal of almost every implant treatment.

This renowned team of authors has filled that gap in exemplary fashion. Illustrated with well over 2,000 figures and numerous flowcharts, this book presents a coherent, evidence-based concept of prosthesis-oriented implant placement and individual esthetic prosthodontic restoration, conceptualized in detail from the first stages of planning to the aftercare period. The key interfaces between implantologist and prosthodontist, prosthodontist and dental technician, and also between the patient and the treatment team, are explained in detail.

Sure to become a future standard text, this book is a must-have, not only for implantologists and prosthodontists, but also for the overwhelming majority of dentists and dental technicians.

Contents

Basics: Patient profile • Esthetic profile • Dental prosthesis profile • Implant-abutment profile • Timing of implant placement, loading protocols • Emergence profile

Treatment concept: Treatment concept • Decision trees

Clinical procedures: Radiographic analysis and the surgical guide • Surgical procedure • Provisional restoration • Impression-taking technique • Maxillomandibular relationship record • Crowns and fixed dental prostheses • Screw retention versus cementation • Removable restorations • Occlusion concepts • Intraoral optical impression methods • Aftercare • Complications

Restoration concepts: Single-tooth gap within the esthetic zone • Multi-tooth gap • Free-end situation • Severely reduced dentition • The edentulous arch

Dental technology procedures: Surgical guides and CBCT planning templates • All-ceramic and metal-reinforced fixed dental prostheses and crowns • Cement- and screw-retained restorations •

Full-arch restorations with and without pink ceramic • Electroplated gold telescopic crowns • Removable dentures anchored with locators, ball attachments, and bars

Fachgebiet(e): Implantologie, Prothetik, Zahntechnik
