Titel: Atlas of Periodontology and Implant Therapy

Kurztext:

Developed under the guidance of the Italian Society of Periodontology and Implantology (SIIP) and with the collaboration of many of its most esteemed members, this two-volume book provides concrete recommendations to all dentists who want to incorporate the most important new research into clinical practice. As a comprehensive reference for effective patient treatment, this book facilitates the application of correct periodontal, implant, and restorative therapies as well as the prevention of complications.

Contents

Chapter 01. Introduction

Chapter 02. Epidemiology, Etiopathogenesis, Anatomical Lesions

Chapter 03. Identifying Periodontal Disease: Periodontal Examination and Diagnostic Procedures

Chapter 04. Classification and Prognosis of Periodontal Diseases

Chapter 05. Causative Treatment: Strategies for the Management of Periodontitis and Control of Risk Factors

Chapter 06. Periodontal Reassessment and Formulating a Final Periodontal Treatment Plan

Chapter 07. Principles of Periodontal Surgery: Critical Elements in Flap Design and Execution

Chapter 08. Instruments for Periodontal Therapy and Implant Treatment

Chapter 09. The Access Flap

Chapter 10. The Apically Positioned Flap and Osseous Resective Surgery

Chapter 11. Periodontal Regeneration in Single-Rooted and Multirooted Teeth without Furcation Involvement

Chapter 12. Treatment of Multirooted Teeth with Furcation Involvement: Surgical, Conservative, and Resective Approaches

Chapter 13. Osseous Resective Surgery in Perio-Prosthetic Patients

Chapter 14. Multirooted Teeth with Furcation Involvement: Regenerative Surgical Approaches

Chapter 15. Root Coverage Techniques for Single Recessions

Chapter 16. Root Coverage Techniques for Multiple Gingival Recessions

Chapter 17. Mucogingival Therapy

Chapter 18. Relationship Between Periodontology and Restorative Dentistry

Chapter 19. Management of Clinical Procedures in Patients with Systemic Diseases Under Pharmacologic Treatment

Chapter 20. Dental Implants and Periodontal therapy: Selection Criteria and Treatment Strategies for Their Use in Daily Practice

Chapter 21. The Foundations of Implant Therapy: The Evolution of Scientific Concepts in Implant Dentistry

Chapter 22. Clinical and Instrumental Evaluation

Chapter 23. Risk Assessment in Implant Therapy
Chapter 24. Implant Surgery in Partially or Fully Edentulous Areas
Chapter 25. Postextraction Alveolar Management
Chapter 26. Postextraction Implants
Chapter 27. Soft Tissue Management and Reconstruction
Techniques
Chapter 28. Horizontal Bone Reconstruction Techniques
Chapter 29. Vertical Bone Augmentation by Means of Guided Bone
Regeneration
Chapter 30. Sinus Elevation Techniques
Chapter 31. Therapeutic alternatives to bone reconstructions
Chapter 32. Implant Placement in the Esthetic Zone
Chapter 33. Peri-implant diseases
Chapter 34. Treatment of Mucogingival Defects and Esthetic
Complications in Implant Therapy
Chapter 35. Supportive Periodontal Therapy
Chapter 36. Long-Term Outcome for Teeth and Implants in
Periodontal Patients
