Buch-Information

Autor(en): Fratila, Alina / Zubcov-Iwantscheff, Alina / Coleman, William P.

Titel: Illustrated Guide to Eyelid and Periorbital Surgery

Untertitel: Applied Anatomy | Examination | Blepharoplasty

Kurztext:
A successful series of illustrated guides on a variety of esthetic dermatological procedures is now followed by the first surgical reference work: The Illustrated Guide to Eyelid and Periorbital Surgery uses the tried-and-tested concept of “hands-on” teaching, communicating practical knowledge to the specialist with a structured approach and eye-catching illustrations.

Aspects of eyelid correction are presented from the expert’s point of view, starting with the anatomical details of the eyelid region, via pre- and postoperative management and all the way to the individual surgical procedures. The instructions are clear and vivid, so they can be readily and independently implemented by the reader. Basic cutting and suturing techniques are taught using intraoperative photographs and high-quality illustrations. Individual indications are tackled with regard to individual planning, the operation and complication management.

• A unique didactic structure communicates the complex aspects of blepharoplasty clearly, accurately and on target.
• High-quality illustrations and photo series demonstrate the operating techniques step by step and down to the smallest detail.
• The authors: the renowned specialist Alina Fratila has been active in esthetic surgery and dermatology for many years working jointly with Alina Zubcov-Iwantscheff, a Frankfurt based ophthalmologist, she has produced a text of the highest level and unique expertise.

Fachgebiet(e): Plastische Chirurgie
